Abstract

From its earliest days, the School of Visual Arts has hosted events featuring established and up-and-coming artists, actors, filmmakers, and intellectuals. These events range from lectures and discussions to symposia and conferences, many of which have been recorded. This collection brings together audio recordings of some of the earliest events at the School of Visual Arts, held between 1963 and 1981, and which include lectures, discussions, symposia, and audience Q&A.
